ARREST OF & PROBABLE COUNTESPEITER .- A suspicious looking man went into the Comnercial House barber-shop last night to get shaved, and offered in pay a five dollar greenback which looked dubious. The barser took it to a mercha t and found it was counterfeit. A boy was sent down to the Police Station to summon a policeman, and the officer laid hands on the gent at once. While walking down to the Station the man tried to throw away his filthy lucro-filthy in a double sense-but was told that act was not at all necessary. A search revealed the fact that he had considerable of this vile trash on his person, and the many conflicting stories he told did not help one whit in removing the "prejudice" from the mind of the policeman, that his price is a

THE REPAIRING OF THE FOREST CITY HOUSE During the last month the Forest City House has been undergoing repairs that have greatly improved its appearance. The entire building within has been repapered and repainted and a new Judies Reception Room added. "Independence Bell," and The Poet's Miseries were rendered in a highly appreciative manner, especially the latter. The Foncing and Musket Exercise elicited great applause. The Institute in deed may be congratulated on having such an invaluable assistant as Mr. A. E. Angier. The evidence of his skill and cu'ture were evident throughout the exercise. The Sourtship of Miles Standish was rendered in good style-John Alden wooing and winning the charming Priscilla, and Miles Standish, the grim Puritan warrior, were each warmly applauded. The pantomine in the 5th scene was encored so enthusastically that the painted savages and their pretty Indian girls were obliged to repeat it. The performance concluded with the presentation, for the first time in this city, of the farce written expressly for these ac tors, entitled, "Petroleum : or, Dad's Struck He." Since its announcement this farce has plaued the curiosity of our theatregoing public, but their expectations that something exceedingly rich would surely come to pass, were doomed to disappointment, for the farce itself amounts to nothing, or even less than nothing.

"ALL ABOUT PETHOLNUK AND MINING."-We have received the above weekly journal, for May 9, and are happy to see that it has been greatly enlarged, and that its scope has been so extended as to embrace the mining interests of the United States. The number of its pages has been doubled, and it will hereafter furnish its readers not only information concerning petroleum, but supply graphic geological descriptions of the territory necessary for petroleum, coal, gold, iron and other mining. To this end its conductors have secured the invaluable assistance of Prof. L. Harper, as a regular contributor and correspondent. The Professor is a correspondent of the Imperial Museum for Natural Science of France, and was for many years Professor of Geology at the University of Mississippi, and State Geologist of that State.

This journal will be the most valuable publication on these mining subjects in the country. It is published by C. Pfirshing, 142, Fulton Street, New York.

STREET GRADING AND PAVING.-The finishing strokes are being put to the work of grading Michigan street. South Ontario street has been graded from Huron street to the Market house. The streets surrounding said house are all to be graded and macadamized. The work will probably be finished in a week or two. The City Council have undertaken a general repairing of the streets of the city, and it will soon have a much finer appearance than at present.

MORNING LEADER OFFICE, FRIDAY EVENISM, HAY 12 1888. } Gold opened strong in New York this mornin ngurated sesturday, a tvanced at the mornin Board, touching the strems at 135% There are have been, however, no e-sential strength in the evement for a rise, and to thraft ruson the ma t gave way, rec ding to 1856. There is wrident y a strong feeling in financial circles that lew-r pures must be resched on g id, and holders of neh go d partake largely of this vi. w and are disosed to sell treely be ore the turn of exchange, aimest certain to result from the produce expornervased demand for Government securities from Eur po, thall compel them to accept still lower prices Aut there is certainly much good reason to his faith in a lower gold premium, based upon the probabilities we have named. The steamer est sais for Europe to-morrow will convey to the cars of foreign capitalists, in the intelligence that the grant popular loan is being taken at the rate of flown millions a day, the most powerful and salutary argument that could be made in behalf of the gold scourities of the Government because the highest possible assurance of the unlimited confidence of our people in the credit of the Government. The effect of this news will undonsted y give trong upp tue to American bonds in every 100 on of Europe, and open a ready market for the large amounts seeking investors there a'ready, it modellon to which large shipments, stated at from twenty five to fifty millions, have been recently made in entict a long of the demand. The effects n exchange rom this son ce slone, when we con ider the prudence being observed in import, an which is likely to be observed for some time t come accesse of the unc stainty as to values this we find a market in Europe for a portion of our demestic products at profitable rates, and by the early re-spening of trade with the South shall be ble to enlarge the shipments of cotton, lobacco pitch, tar, rosin, &n, there can be no question that gold would be forced to yield, spite of all speculaive efforts to the contrary, to the reversal of situ

tion produced by these circumstances. The ques-tion of the future value of gold unforbiedly de-pends now upon our financial relations abroad, and the prospects are most flattering that these still be in the highest degree favorable Financial matters in this city are quist. There salances are chiefly aff cted by the subscriptions i fremeury. Exchange is in pretty free supply and without marked demand. It is are steady at par beying and 1-10 to 1/2 premium selling. The Sec-

ed Sational Bunk to day pall Government drafts to the amount of \$700,000. The beingraph to night reports but thirty-live Illions remaining of the present series of Sevenorties. This amount will undoubtedly be subposing of the sorfes of three hundred millions in a period of about forty we king days, and a mon h suferior to the date at which interest upon it will mmence, June 18th. The same dispatch says it layrob, life the remaining two hundred and thirty millions under the 7 30 act will be issued as th hard mries, bearing date October 15.
